

## The BrewSmith Story, so far...

Our passion for brewing beer at home started around 2 years ago when we bought a homebrewing book and kit. We excitedly started on our beer making journey and whilst sometimes we made really good tasting beer, sometimes we really didn't - the results weren't at all consistent. We just weren't sure what we were doing, we didn't really know where to go for help and what do you do with 30 litres of beer that doesn't taste that great?

We didn't want to upset our friends any more with our hit and miss beers so we decided to develop our own beer making kit. We imported kits from around the world and set about trying to find the best elements. We made lots of beer, we drank lots of it (yes, aren't we dedicated!) and we think we've developed the best beer making kit there's ever been. Introducing BrewSmith!
